Abstract (en)
    [origin: WO2015176740A1] The present invention relates to a system of stackable and/or nestable type containers (1) comprising at least one
    first container and at least one second container. The first container comprises a plurality of columns (9) enabling the first container to be stacked
    on and/or nested into the second container and the system comprises a means (11,12) for evacuating liquid out of said containers. The present
    invention also relates to a system of stackable and/or nestable type containers comprising at least one first container and at least one second
    container. The first container comprises a plurality of columns enabling the first container to be stacked on and/or nested into the second container
    and the second container comprises a means (14, 15) for stabilizing the first container with relation to the second container.
