Abstract (en)

[origin: WO2015176084A1] The invention relates to a module (1) for forming a mobile protective wall (2) for flood protection, wherein the module (1) has a first end face (3) and a second end face (4) which lies opposite the first end face (3). The first end face (3) has an undercut groove (5), and the second end face (4) has a protrusion (6) which corresponds to the groove (5). The protrusion (6) is designed to removably form a pivot connection with another module (1) which has the first end face (3), and the pivot connection (7) can be pivoted by a specified pivot angle.
