Abstract (en)
[origin: WO2015178860A1] An electric fuse mounting comprises a casing (1) consisting of electric insulating material, while on the lateral surfaces (14', 14'') of said casing (1) two connecting terminals (15', 15'') are arranged, and each of them comprises a screw (17', 17''). At least one of said screws (17', 17'') is arranged in the central plane (100) of said casing (1) but extends inclined at a pre-determined angle (α , β) with respect to the central geometric axis (120) of the cavity (12) adapted to receive the fuse.
