Abstract (en)

[origin: EP3148228A1] The embodiments of the present invention disclose methods, apparatuses and systems for playing video media, and a computer storage medium. The method applied to a network side includes: receiving an audio call request from a calling terminal; acquiring video media information that needs to be played in a current call; and playing the video media for the calling terminal. The method applied to a terminal side includes: sending an audio call request to a network side; and receiving and playing video media from the network side. The apparatus applied to a network side includes: a receiving module arranged to receive an audio call request from a calling terminal; an acquisition module arranged to acquire video media information that needs to be played in a current call; and an execution module arranged to play the video media for the calling terminal. The apparatus applied to a terminal side includes: a sending module arranged to send an audio call request to a network side; and an execution module arranged to receive and play video media from the network side.
