Abstract (en)
[origin: WO2015185094A1] The present invention relates to a refrigeration appliance (2) comprising an ice cream making apparatus (1) which comprises a container (3) for holding ice cream, a stirrer (4) for agitating the ice cream, and a motor (5) for driving the stirrer (4), a freezer compartment (6) accommodating the ice cream making apparatus (1), a control unit for controlling the motor (5), and a user-interface. In the refrigeration appliance (2) of the present invention, the control unit has one or more than one ice cream mode, each ice cream mode being selectable via the user-interface.
