Abstract (en)

[origin: WO2015136497A1] A device (10) for the local heat conditioning around a shelf (100) is disclosed comprising at least a heat conditioning member (14, 204) provided with heating means and with an air moving fan, mounted underneath said shelf (100) through a support structure fixed to the lower surface of said shelf, wherein said heat conditioning member (14) is mounted so that said fan generates an airflow directed substantially horizontally and radially towards the outside of said shelf (100), said support structure comprises at least fixed sliding means (101, 206) and a fastening shuttle (11, 202) slidably mounted with respect to said fixed sliding means (101, 206) through releasable constraining means (12, 203, 205), said at least heat conditioning member (14, 204) being integral with said fastening shuttle (11, 202), said fastening shuttle (11, 202) furthermore comprising a power supply socket/plug (15), for supplying power to said at least heat conditioning member (14, 204), apt to be connected to a power supply plug/socket (16).
