Abstract (en)
[origin: WO2015185557A1] A sliding assembly comprises two deployment guides (10) which can be secured to opposite side walls (3) and each of which includes a stationary guide rail (11), a central rail (12) movably mounted on the guide rail (11), and a running rail (13) movably mounted on the central rail (12); a first slidable element (5) is retained on the two running rails (13) of the two deployment guides (10), and a second slidable element (6) is retained on the two central rails (12) of the two deployment guides (10). Thus by moving one slidable element, the other slidable element can also be moved.
