Abstract (en)
[origin: WO2015185493A1] The present invention relates to a gripping device (1), in particular as effector for an industrial robot, comprising two clamping jaws (10, 20) which are movable relative to each other to engage a workpiece. At least one of the clamping jaws (10, 20) comprises a safety element (30, 40) which is movably mounted on the clamping jaw and can be moved between a safety position and a release position in order to prevent objects or body parts from being accidentally inserted in the occupied space.
