Abstract (en)

[origin: WO2015185079A1] The present invention relates to a laundry treatment appliance (1) with a condensate water accumulation reservoir (5) with a condensate water lint disintegration unit (9). The present invention more specifically relates to a laundry treatment appliance (1) effecting drying of the laundry placed in a drum (2), the laundry treatment appliance (1) comprising a front door allowing access into the drum (2) installed in a tub, a heat exchange unit effecting condensation of moisture contained in the processing air being circulated, a discharge line (4) in fluid communication with the heat exchange unit and leading to a condensate water accumulation reservoir (5) provided to collect the condensate water.
