Abstract (en)
[origin: WO2015180774A1] The application relates to a screed assembly (1) for laying a road surface (3), said screed assembly (1) determining a working width (W), viewed in the working direction (R), for the laying of the road surface (3), and a working station (9) for an operator (P) being mounted on the screed assembly (1). The working station (9) is mounted on the screed assembly (1) in a vibration-decoupled manner, such that the transmission of vibrations from the screed assembly (1) to the working station (9) can be reduced or prevented.
