Abstract (en)

[origin: WO2015185097A1] The present invention relates to a drain hose holder (1) for use in a water conducting household appliance (2) comprising a corrugated drain hose (3) having a plurality of sequentially and coaxially formed ridges (3a, 3a') and valleys (3b, 3b') which are circular shaped. The drain hose holder (1) comprises a support (4) for securing the corrugated drain hose (3). In the drain hose holder (1) of the present invention, the support (4) includes an arc-shaped first notch (5) into which a valley (3b') is insertable without any deformation of the corrugated drain hose (3) and an arc-shaped second notch (6) into which one or more than one ridge (3a) is insertable under elastic deformation of the corrugated drain hose (3).
