Abstract (en)

[origin: EP3150790A1] The object of the invention is the method of joinery fitting and the set of joinery fitting elements based on segment elements, applied in energy-efficient and passive construction industry. The method of joinery fitting based on segment elements made from rigid EPS in the form of the mounting beam (1), the ground beam (2), the internal basis (4) for window sills and the external basis (3) for window sills, joined tightly with the wall and joined with each other with special locks and other known elements in the form of glues, assembly foams, assembly connectors and sealing tapes:
