Abstract (en)

[origin: EP1790830A1] The turbocharger has blades (7) arranged in a turbine housing between an exhaust gas inlet and a turbine wheel. Each blade has an upper side (8) and a lower side (9), which defines blade thickness. Each blade has front and rear edges (10, 11) that are provided at respective intersection points of the lower and upper sides. Each blade has a profile center line that is defined in the lower and upper sides and runs between the lower and upper sides from the front edge to the rear edge. An independent claim is also included for a blade of a turbocharger.
