Abstract (en)

[origin: WO2015185230A1] The present invention relates to a dishwasher (1) comprising a body (2) having two side walls (3); a door (4) providing access into the body (2); a rack (5) whereon the items to be washed are placed, having a washing position wherein the rack (5) is entirely inside the body (2) and a loading/unloading position wherein the rack (5) is partially taken outside the body (2) by being pulled forwards, and an elevating means (6) that enables the rack (5) in the loading/unloading position to move in the vertical direction and having at least two lifting arms (7) that enable the rack (5) to be supported, each extending in the horizontal direction from one of the side walls (3).
