Abstract (en)

[origin: WO2015187004A1] The present invention relates to a method of manufacturing and filling a package with a powdered nutritional product, such as infant nutrition or milk formula, the method comprising providing a thermoformed tub having sidewalls and a base defining a product receiving space, filling the product receiving space with the powdered nutritional product, and sealing a membrane across an open mouth of the tub to seal the product therein; and folding a carton blank with a plurality of panels around the filled tub to form a carton sleeve, wherein the carton sleeve comprises a peripheral wall enclosing at least the sidewalls of the tub. The invention also relates to a package for such a powdered nutritional product manufactured according to this method.
