Abstract (en)

[origin: WO2015185849A1] The invention relates to a solar protection glazing comprising a substrate, preferably a glass substrate, said substrate being covered with a coating of dielectric materials on each of the surfaces thereof, wherein each of said coatings consists of a film based on titanium oxide or a stack of films consisting of dielectric materials incorporating such a film, the thicknesses of said films based on titanium oxide in each of the coatings being between 10 and 70 nm.
