Abstract (en)  
[origin: WO2016030283A1] The invention relates to a sliding door (10) which comprises: a brake element (40) for breaking the door leaf (30); an adjustment device (50) designed to switch the brake element (40) over from a braking position, in which the door leaf (30) is being braked, to a release position, in which the door leaf (30) is not being braked, and from the release position to the braking position; and a motor drive unit (60) which is designed to cooperate with the adjustment device (50) and to allow the brake element (40) to be adjusted.
