Abstract (en)

[origin: WO2015185033A1] The invention relates to a method for establishing an underwater map, said method having the following steps: a) establishing three-dimensional sonar data by means of a first sonar, b) establishing underwater parameters using the established three-dimensional sonar data, and c) adapting an initial underwater map in particular using initial underwater parameters and a correction algorithm which uses the established underwater parameters, such that a new underwater map is obtained.
