Abstract (en)
[origin: KR20150140212A] The present invention relates to a wearable device and a control method of the wearable device. The wearable device includes a replaceable fixing unit which transfers pre-stored user interface (UI) data to a main unit, and the main unit which provides interaction according to the transferred UI data. According to the present invention, the wearable device can automatically download proper applications for each thing, not download applications respectively.
