Abstract (en)

[origin: US2017095081A1] A device for releasably connecting a furniture pull-out to a guidance unit that movably guides the furniture pull-out in a furniture body comprises: a base part; an adjuster arranged on the base part and comprising a plurality of components movable in relation to one another, the adjuster enabling a position of the furniture pull-out to be set in at least one spatial direction relative to the guidance unit; and a stop mechanism to delimit the travel of the adjuster, the stop mechanism including a springy-elastic component.
