Abstract (en)

[origin: EP3153774A1] Gas generator (1) adapted for cogeneration systems, particularly for Stirling cogeneration systems, comprising a main body (2) demarcating a combustion chamber (3), a fuel inlet (6) for the entry of fuel into said combustion chamber (3), a secondary body (4) surrounding the main body (2) demarcating a secondary chamber (5), and an outlet conduit (9) for the exit of combustion gases. The gas generator (1) comprises a discharge conduit (8) communicating the combustion chamber (3) with the secondary chamber (5), said discharge conduit (8) communicating tangentially with the combustion chamber (3).
