Abstract (en)
A heating panel (1) comprises at least one support (2) having a surface (3) and at least one portion (4;4a,4b) of a heating fabric (4) associated with the surface (3), wherein the heating fabric (4) is provided with at least one weft (5) comprising at least one continuous wire (5a) made of electrically conductive material, and a warp (6) made of non-electrically conductive material, at least one coupling layer (7), made of polymer material, applied to the surface (3) and around which the portion (4;4a,4b) of the heating fabric (4) is at least partially embedded, such that the material of the coupling layer (7) penetrates between the interstices present between the weft (5) and the warp (6).
