Abstract (en)
[origin: WO2015189529A1] The invention concerns a cassette comprising a sterile barrier (39) with attachment brackets (45), each attached to a guide member (24, 24') for guiding an elongate flexible medical device, and flexible portions (44) between two adjacent attachment brackets (45). The flexible portions are rigidly connected to the attachment brackets. The guide surfaces (46) of the attachment brackets come into contact with the elongate flexible medical device.
