Abstract (en)
[origin: WO2015189145A1] The invention relates to a grinding disk having a grinding region (2) which is effective in the circumferential direction and comprises a bonded abrasive medium, and with reinforcing elements (3) which are not involved in the grinding operation. According to the invention, the reinforcing elements have at least one reinforcing washer (3) arranged at the end face, said washer comprising no abrasive medium and being dressable.
