Abstract (en)

[origin: WO2015188902A1] The invention relates to a winding machine (1) for winding slivers made of cotton, comprising a winding unit on or in which a compress is formed, wherein the winding machine has a device for producing a winding force on the cotton compress (15). The invention further relates to a method for winding slivers. The invention is characterized in that the winding force increases continually over the winding length, at least at the start of the winding process.
