Abstract (en)  
[origin: WO2015189667A1] The invention relates to a winding device for winding a yarn (20), wherein the winding device (19) comprises a base plate (2) which can be set in rotary motion with the aid of a drive (3), wherein the base plate (2) has at least two sleeve receptacles (4) spaced apart from one another, wherein each sleeve receptacle (4) can be set in rotary motion with the aid of a sleeve drive (5), and wherein a sleeve fixing (6) which is movable between a sleeve fixing position and a sleeve release position is associated with each sleeve receptacle (4). According to the invention, the sleeve fixings (6) are fastened to the base plate (2) and can be set in rotary motion together therewith.
