Abstract (en)

[origin: WO2015189129A1] The invention relates to a base assembly (16) of a clothes dryer (12) having a housing, comprising at least one partition base (18) which is arranged underneath a heat source (14) and heat sink (15) of a heat pump (13) of the clothes dryer (12), and on which the heat source (14) and the heat sink (15) are positioned, characterised in that at least one recess (19) is formed in the partition base (18), said recess being basin-like, water-tight and being open in the direction of the heat source (14), wherein a base (20) of the recess (19) is positioned entirely underneath a maximum fluid filling height F of a fluid container (21) arranged under the partition base (18) on the base side, and the heat source (14) is positioned on the base (20). The invention also relates to a clothes dryer (12) having a base assembly (16) of this type.
