Abstract (en)

[origin: WO2015188206A1] The invention relates to a barrier element (6) of a vehicle restraint system, comprising a concrete body (7), wherein at least one tension element (1) is arranged in the concrete body (7), wherein the at least one tension element (1) is connected to at least one coupling part (21, 22) protruding from the concrete body (7) at least in some regions. According to the invention the at least one tension element (1) and the at least one coupling part (21, 22) are connected to each other by means of a positive-locking connection.
