Abstract (en)
[origin: WO2015193279A1] The invention relates to a safety system (10) for a breechblock system (1) of a weapon, comprising at least one weapon support (100), a breechblock support (2), a breechblock (3) or breechblock head (3.1) borne by the breechblock support (2), and a firing pin (7) located therein, which firing pin has a firing-pin spring (7.1), characterized by a breechblock sleeve (20), which is integrated between the breechblock (3) or the breechblock head (3.1) and the breechblock support (2). A slope (21) is integrated in the breechblock sleeve (20) in the rear end wall (22) of the breechblock sleeve (20). The rear straight line (21.1) forms a safety position and the front straight line (21.2) forms a striking position of the firing pin (7).
