Abstract (en)
[origin: WO2015189025A1] The invention relates to a vehicle lidar system (101) comprising: • a pulsed laser (103) for emitting laser pulses, • at least one displaceably mounted mirror (105) for deflecting the laser pulses towards objects to be detected (109), • a receiver (111) for detecting the laser pulses reflected by the objects, wherein • the receiver comprises a CMOS-compatible image sensor (113) for detecting the reflected laser pulses and capturing an image of a region that can be illuminated by the deflected laser pulses. The invention also relates to a use of the vehicle lidar system.
