Abstract (en)
[origin: WO2015189289A1] The invention relates to a shielded connector for a motor vehicle. The connector comprises at least one casing shielding element (26). The shielding element (26) includes a cable outlet portion (34) provided with a plurality of resilient tabs (36) that are integral with the shielding element (26). The tabs (36) include a contact zone in electrical contact with a ferrule (24) crimped to a shielding braid of a cable. The contact zone is maintained pressed against the shielding braid by means of a removable clamping ring.
