Abstract (en)
[origin: CN106901587A] The invention relates to a household cooking device. The household cooking device comprises a cooking container, which is used to accommodate to-be-cooked food; a stirring mechanism, which is detachable with respect to the cooking device, and is used to stir the food in the cooking device; a cover, which is used to close the cooking space, and is used to at least partially limit the cooking device; a driving mechanism, which is used to drive the stirring mechanism to move, when the stirring mechanism being installed on the cooking device. The household cooking device is characterized in that the driving mechanism is disposed in the cover.
