Abstract (en)

[origin: US2017087794A1] The invention relates to a corrugated board machine for producing corrugated board. The corrugated board machine comprises a detecting arrangement for detecting at least one web of corrugated board web, an order change cutting device arranged downstream of the detecting arrangement and an information processing device, which is in signal connection with the detecting arrangement. Furthermore, the corrugated board machine has a control device, which is in signal connection with the information processing device, with which the order change cutting device is in signal connection and as a function of a change identified by the information processing device of a first printing area printed on the web of corrugated board web to a second printing area printed onto the web of corrugated board web activates the order change cutting device to perform an order change on the corrugated board web.
