Abstract (en)

[origin: WO2015193260A1] The invention relates to a device for applying a cosmetic product, in particular mascara, comprising an applicator (10) and a mesh (20), said applicator (10) comprising a plurality of fibres (12) forming an applicator zone (Z). The applicator (10) is able to be moved with respect to the mesh (20), said mesh (20) defining a lattice intended to be passed through by said fibres (12), said device being configured to vary the deployment of said fibres (12), from said mesh (20), when the applicator (10) is moved with respect to the mesh (20).
