Abstract (en)

[origin: WO2015193852A1] A modular socle (1) for plasterboard curtain walls (100) and the like, comprising a rear supporting framework (101) structured to be stably anchored to the floor (p), and one or more curtain panels (102), which are rigidly fixed onto the supporting framework (101) so as to be locally substantially coplanar and closely side-by-side arranged to one another, so as to cover/coat said supporting framework (101); the modular socle (1) comprising: at least one rectilinear supporting longitudinal member (2) substantially shaped as a plate-like splint, which is adapted to be rigidly fixed to the supporting framework (101) between the floor (P) and the curtain panel (102) immediately adjacent to the floor (p), with the two lateral sides (p) one locally tangent to the floor (p) and the other locally tangent to the lower side (102a) of the curtain panel (102), so as to be locally substantially coplanar with the immediately superjacent curtain panel (102); and at least one skirting board (5), which extends parallel to the longitudinal axis (L) of the longitudinal member (2), and is fixed in a rigid and stable, though easily removable manner, onto the exposed front face (6) of the longitudinal member (2).
