Abstract (en)

[origin: WO2015193853A1] A system for managing a vehicle mission of a goods delivery vehicle, said goods being defined by a plurality of parcels to be delivered, the system comprising a cartographic satellite navigation system adapted to drive the vehicle along a route comprising a plurality of stops corresponding to the delivery places of one or more of the parcels, means for calculating an interval of time expected for the vehicle to cover the distance between each of the stops, means for acquiring the weather forecasts of geographical areas containing each of the stops at least for an interval of time when the vehicle is expected to be travelling between them.
