Abstract (en)  
[origin: EP3159544A1] In a scroll compressor, a bush assembly (37) includes: a bush (41) with a contact end surface (41b) in contact with an end surface (19a) of the rotating shaft (19) when the eccentric pin (25) is inserted therein, being inserted into a boss (35c) at a bottom surface of the orbiting scroll (35); a balance weight (43) with a connected portion (43A) in an outer peripheral portion of the bush (41) near the contact end surface (41b) and a weight (43B) with a cantilevered shape in a portion of an outer periphery of the connected portion (43A) so as to stick out in a direction away from the contact end surface (41b); a stepped portion (47) between the connected portion (43A) and the contact end surface (41b); and at least one joining portion (49) in the stepped portion (47), joining the bush (41) and the connected portion (43A).
