Abstract (en)  
[origin: WO2015197325A1] The invention relates to a water-bearing domestic appliance (100), in particular a dishwasher, having a number of actuators (110, 111, 112) for carrying out a plurality of dishwashing programs (P), a user interface (113) for selecting one of the plurality of dishwashing programs (P), a sensor (114) for providing a sensor signal (S) for specifying a parameter of a dishwashing liquor which is used for washing washware, a determination unit (115) for determining a sensor setting (E) from amongst a plurality of predetermined sensor settings for the sensor (114), a control unit (116) which is designed to drive the actuators (110, 111, 112) for carrying out the selected dishwashing program (P) by means of a signal processing system which uses the sensor signal (S), and an adjustment unit (117) for adjusting the signal processing system depending on the specific sensor setting (E).
