Abstract (en)
[origin: WO2015198196A1] The present invention describes an improved complete therapy for protecting and healing lesions or serious bedsores and vascular and diabetic ulcers, starting from the composition of a medical device basically constituted by a mixture of the following component elements: powdered sugar, liquid 10% povidone-iodine; petroleum jelly, also referred to as Vaseline, soft paraffin, or petrolatum, together with the addition in equal percentages of olive oil, white mineral oil, also referred to as liquid paraffin, and orange- blossom honey, the latter with oily consistency. The composition comprises said component elements in percentages that set in appropriate proportions with one another give rise to golden ratios. The present composition solves innumerable problems that have not been solved by known similar compositions, constituting a valid life-saving drug maintaining unaltered its own characteristics over a time range of at least two years, likewise guaranteeing complete healing of extremely serious lesions at Stage 4 in a maximum time range of six months.
