Abstract (en)
[origin: WO2015197114A1] The invention relates to a hand-held steam device comprising a housing (12) and a pressure accumulator device (70) having a steam valve (100) arranged in an internal space (24) of the housing (12), wherein the housing (12) comprises a housing shell device (14) having a first housing shell (16) and a second housing shell (18), said first housing shell (16) and said second housing shell (18) being connected to one another, wherein the housing shell device (14) has an opening (50) leading to the internal space (24), characterised in that a housing insert (58) is arranged on the opening (50), closing said opening (50), and in that at least one of the following elements is arranged on the housing insert (58): a steam outlet actuating element (92); a moving lever element (108) that can act on the steam valve (100) in order to actuate same; and a child safety lock actuating element (94).
