Abstract (en)
[origin: WO2015197241A1] The invention is based on a portable machine tool, in particular on a hand-held planing machine, having at least one workpiece positioning unit (12) which has at least one workpiece positioning surface (14, 16), and having at least one insert tool unit (18) which, in order to permit processing of workpiece, projects at least partially over the at least one workpiece positioning surface (14, 16). It is proposed that the portable machine tool comprises at least one adjustment unit (20) by means of which, in at least one state, at least one orientation of the insert tool unit (18) and/or of the at least one workpiece positioning surface (14, 16) relative to one another can be set.
