Abstract (en)

[origin: WO2016000817A1] The invention relates to a security element for use in security documents, comprising a first sheet element (20) which has at least one transparent and/or translucent region (30) and at least one second sheet element (21), said first and second sheet element being paired with each other. According to the invention, first information (60) is arranged in the transparent and/or translucent region (30) of the first sheet element (20), and second information (70) is arranged on a section (40) of the second sheet element (21). Furthermore, the section (50) of the first sheet element (20) and the section (40) of the second sheet element (21) are paired with each other, and first and second information (60, 70) are combined to form complete information.
