Abstract (en)

[origin: WO2016000959A1] The invention relates to an arrangement (100) for a motor vehicle for absorbing energy during an accident, comprising cover means (101) and several energy absorption units (102) which are arranged next to each other, the cover means (101) cover one side of the energy absorption units (102), which, in the installed position in the vehicle, face forwards. Said covering means (101) have a lower rigidity in the first partial region than in the second partial region (201).
