Abstract (en)

[origin: WO2016001214A1] The invention relates to a device for dispensing gas from a submarine. This device has a pump for conveying sea water whose outlet is line-connected to an inlet of a pump for re-dispensing the sea water. The two pumps are energy- and/or force-coupled to one another. The device further comprises means for introducing gas into the line connection between the two piston pumps.
