Abstract (en)

[origin: WO2016001526A1] The invention relates to a fluid control assembly (1) of a valve having at least three channels, in particular for a motor vehicle, the assembly (1) including: a movable metering member (12) arranged to selectively open or seal a first (2) one of the three channels; a movable switching member (10) arranged to seal a second (9) or third (11) one of the three channels selectively; and an actuating device (15) for actuating the two members (10, 12), the assembly (1) being arranged such that, in a first operating range, the actuating device (15) actuates the switching member (10) while leaving the metering member (12) immobile.
