Abstract (en)
[origin: WO2015197118A1] A pressure storage device is proposed, which comprises a storage container (130) with a first region (132) and a second region (134), wherein a closable opening (80) is formed on the second region (134), and a steam valve (100), which is arranged on the storage container (130), wherein, between the first region (132) and the second region (134), the storage container (130) has a recess (144) which is bounded by a first wall (146) of the first region (132) and a second wall (148) of the second region (134), and wherein the steam valve (100) sits in the recess (144) on the first region (132).
