Abstract (en)
[origin: EP3162736A1] The invention relates to a quick system device (10) for a semi-underground waste container (30). The quick system device (10) comprises a frame structure (31) that is arranged to be positioned on the edges of a container body (35) of the semi-underground waste container (30), a lifting bag (33) fixed beneath the frame structure (31) and arranged to be placed inside the container body (35) for receiving waste, a lid (34) comprising a drop-hole opening (36) and arranged on top of the frame structure (31), a hinge structure (32), wherein the hinge structure (32) is connected between the frame structure (31) and the lid (34) for enabling opening of the lid (34), and a lifting loop (39) that is attached on top of the frame structure (31). The lifting loop (39) extends through an opening of the lid (34). The quick system device (10) is arranged to be lifted when emptying the lifting bag (33). The invention further relates to a semi-underground waste container (30) comprising a quick system device (10) and a quick system kit for retrofitting a semi-underground waste container (30).
