Abstract (en)

[origin: EP3162951A1] Blowing unit adapted to be part of a drying system (10) of a household appliance (1) configured to perform at least a drying cycle, wherein said blowing unit (5) comprises: a casing (51) made of metallic material; an impeller (59) rotatably mounted in said casing (51); an electric motor (52') mounted on said casing and adapted to drive said impeller (59) in rotation; a magnetic shielding (56) interposed between said electric motor (52') and said casing (51). A household appliance adapted to perform at least a drying cycle, comprising said blowing unit (5), is also disclosed.
