Abstract (en)  
Single gate comprising a post; a closing part fixed to a swing rod part located outside the post; a drive arranged in the post and configured to rotate a drive rod arranged parallel to the swing rod part; wherein the drive rod is connected to the swing rod part by means of a rod assembly, wherein the rod assembly comprises a first and second parallel arm and a first and second parallel rod, which are connected pivotally to each other at their outer ends in order to form a parallelogram linkage; and wherein the drive rod is fixed to the first arm, and the swing rod part is fixed to the second arm, such that a rotation of the drive rod results in a rotation of the swing rod part for pivoting the closing part for opening or closing the gate.
