Abstract (en)
[origin: WO2016000779A1] A household appliance mixing arrangement (1) is provided. The arrangement (1) comprises a mixing container (2) and a hook (3) with a curved elongated portion (6). The hook (3) is attachable to a drive arrangement (16) via a through hole (2') in a first inner surface portion (10) of the mixing container (2) such that the hook (3) is rotatable around an axis of rotation (A) within the mixing container (2). The curved elongated portion (6) extends in a first direction (F), being downwards from the axis of rotation (A), substantially in parallel with the first inner surface portion (10) of the mixing container (2), and at least a part of the curved elongated portion (6) extends in a second direction (S), forming an angle (α) with a first plane (P) defined by the first direction (F) and the axis of rotation (A).
